

SECURIKETT®

What is a
SecurityLabel
and what is it
used for

SECURIKETT®

Tamper-evident **Security**Labels & **Security**Seals serve as a clear indicator of tampering, protecting brands and consumers from fraud.

SECURIKETT®

The so-called **VOID effect** reveals signs, symbols, texts, or logos once a **SecurityLabel** has been tampered with.

SecurityLabels can be equipped with additional **layers of security:**

- Unique QR-codes
- Holograms
- Luminescent ink
- Temperature-sensitive inks
- & many more...

SECURIKETT®

The **VOID effect** also enables the integration of hidden PIN codes, which are copy-proof by design. The **hidden PIN** is revealed only upon removal, allowing the product to be authenticated.

SECURIKETT®

Our **Security**Labels can be fully **customized** to your corporate design.
Surprise your customers with your logo in the VOID effect!
